- ☒ Jordanian Board Obgy
- ☒ Fellowship of American College of Obstetrics and Gynaecology

Masters:

- ☒ Master Black Belt SIGMA
- ☒ Master in IVF and Reproductive Medicine
- ☒ CPHQ: Certified Professional in Healthcare Quality
- ☒ Masters in Laparoscopy and Endoscopy
- ☒ OET Band B: Valid

Volunteering & Community Services:

- ☒ Actively participated in the quarterly Pulse Polio Program (1996 – 2002) of Govt. of India for the eradication of Polio.
- ☒ A participant in a scientific exhibition titled “MEDEX – 1” in Feb 2002 in India, targeted towards educating school children.
- ☒ Participated in ‘Blood Donation Camp 2002’ as a volunteer.
- ☒ Prominent contribution covid 19 pandemic in treating corona positive cases

Courses & Meetings:

- ☒ Masters in IVF and Reproductive Medicine – from Keil University, Germany.
- ☒ Masters in Gynaecological Endoscopy – Laparoscopy and Hysteroscopy – Keil University, Germany.

SERVICE DEVELOPMENT EXPERIENCE

- ☒ Sound knowledge of proven methods to create positive, sustainable changes like PDSA cycle, stakeholders meetings, process mapping, demand, and capacity management for systematically progressing through the Quality and Service improvement projects.
- ☒ Prominent front-line clinician in managing covid-19 affected pregnant women and actively took part in the ongoing care and delivered them safely. Discharged both mother and baby safe.
- ☒ Awarded certificate of thanks and appreciation from the ruler of Dubai for selfless contribution in an acute time of crisis of corona.
- ☒ Completed the audit post caesarean section infection rate in private hospital viz Dr Sulaiman Al Habib in driving Obstetric Enhanced Recovery on a national picture.

RESEARCH EXPERIENCE

- ☒ Breech vaginal delivery – Does it improve the morbidity or mortality associated with breech delivery.
- ☒ Hysterectomy for benign conditions--Quality and Safety?” This study evaluated the implementation of the enhanced recovery programme for elective gynaecology cases, the main elements of which were: preoperative planning, preparation, optimization of Hemoglobin levels, maximizing patient knowledge and involvement in the recovery process, early mobilization, and early catheter removal. The results from the study showed that the median length of stay fell from 3.5 to 4 days ($p=0.010$), the duration of postoperative catheterization decreased from day 1 to day 0 ($p=0.006$), and the duration of immobility decreased from day 1 to day 0 ($p=0.006$) after the introduction of ERP. The readmission rate was unchanged ($p=0.128$). This study demonstrates that the introduction of ERP decreases the length of stay without compromising safety after an elective hysterectomy.

PRESENTATIONS

- ☒ Audit of Surgical Site Infection Post Caesarean Section
- ☒ Rate of VBAC in Private Hospitals – Factors Affecting the Success

PUBLICATIONS

- ☐ A high index of suspicion key to diagnosing ectopic pregnancy **RCOG congress poster presentation.**
